

DISCOVERY DAYS!

Grapefruit

- It is a hybrid fruit originating in Barbados as an accidental cross between an orange and pomelo.
- February is National Grapefruit Month.
- Grapefruit are hand-picked, no mechanical harvesting is used.
- Grapefruit trees can reach up to 30 feet tall.
- A single tree can produce 1,500 pounds of fruit.
- They come in a variety of colors including pink, red, white, and golden.
- The Texas Red Grapefruit was designated as the official fruit of Texas in 1993.
- Most of today's grapefruit are grown in Florida and in one specific region of Texas, that has the necessary subtropical climate for them to thrive.
